PROJECTS

1.Weather Forecast Web App
HTML, CSS, JavaScript, OpenWeatherMap API

- Developed a responsive web app that displays real-time weather information based on user input.
- Fetched weather data using OpenWeatherMap API and displayed temperature, humidity, and condition icons.
- Implemented error handling for invalid city names and improved user experience with clean UI design

2. Movie Explorer App
React.js, OMDb API, local Storage, HTML, CSS

- **API**: Use OMDb API

- **Features**:
- **Search Movies**: Users can input a movie title to fetch real-time data from the **OMDb API** and display a list of matching movies.
- **Movie Details**: Clicking on a movie displays full details, including poster, genre, plot, IMDb rating, and more.
- **Favourites List**: Users can add movies to their favourites. The list is saved in **local Storage** and is accessible even after refreshing the page.
- **Responsive UI**: Designed a clean and intuitive user interface using **CSS** to ensure compatibility across various devices.
